FOR IMMEDIATE RELEASE

A-BE-C President, Pamela Artigas to present at Bladder Health Alliance (BHA) Roundtable Meeting in Washington, DC

Washington, DC - October 1st, 2019 – A-BE-C Executive Director will join a panel of patients, physicians, researchers and advocates for Bathroom Policies & Bladder Health Education at the [Bladder Health Alliance](#) this week. Artigas will be presenting findings from a recent A-BE-C survey regarding school bathroom issues from our A-BE-C community.

As President and Executive Director of A-BE-C, Pamela's leadership goals are to forge partnerships with patients, their families, and the medical community to enhance the care and clinical outcomes, provide value and improve the quality of life for children born with this condition.

"This is long overdue. We need to change the stigma surrounding what is considered standard rules for using school restrooms. I'm honored and grateful to be a part of this movement to help advocate and advance public policy."

Pamela Artigas is a mother by choice of a child with bladder exstrophy. Pamela has a passion for, and an understanding of, this rare medical condition. In 2009, Pamela adopted her then 4-year-old daughter from China who was born with bladder exstrophy. Since then, Pamela has made it her life's mission to develop a global support network with medical credibility.

[The Association for the Bladder Exstrophy Community](#) (A-BE-C) is an international support network for patients and families living with bladder exstrophy. The organization is committed to ensuring all people affected by bladder exstrophy have the opportunity to realize their greatest life purpose and potential.
